LARGE CAP SEASONALITY PERFORMANCE:

The stocks are selected across a 400 stock large cap universe by looking at prior returns during rolling 3-month periods. The look back period is 5 years.

The basket is created quarterly for the upcoming 3-month period. The assets are reinvested at the end of their 3-month periods into the next 3-month basket.

The chart below shows the growth of \$10,000 for our large cap seasonality and the SPY. Since Q3 05, \$10,000 would have grown to \$12,489, or **29.7% more** than a similar investment in the SPY, which would be worth \$9,627.

The EBCM Large Cap Seasonality picks have beaten the S&P in 2 of every 3 quarters since Q4 '05.
